Climate Change and Sustainability Position Statement

We:

1. Recognise the urgent need for collective action on climate change in the face of unequivocal scientific evidence.
2. Are committed to:
 - Providing effective leadership and governance to address the issues of climate change locally and nationally within and across sectors.
 - Increasing awareness of the people we support, our staff and other stakeholders regarding the range and impacts of climate change (as well as the disproportionate impacts on marginalised communities including people with a disability) and their responsibilities to make positive climate changes as part of the wider changes needed.
 - Reducing carbon emissions and implementing energy saving initiatives across the properties and vehicles we own and those we lease / rent / hire.
 - Supporting initiatives that protect and promote nature for present and future generations.
 - Finding innovative, sustainable, and inclusive solutions in how we work and live together.
 - Measuring, tracking, and reporting our changes.
 - Working positively and collaboratively with others – within and across sectors – to address climate change.
 - Securing additional funding to deliver innovative and transformative projects for the benefit of people we support, staff and other key stakeholders, including our local communities and our planet.
 - Working with universities and other academic institutions to increase knowledge and data linked to climate change, sustainable practices and disability.
3. Challenge unsustainable practices that are harmful to current and future generations.
4. Remain kind, curious, open-minded and are committed to using our Mission and Values to guide us through long-term change.
